Knowledge Intake - API Guide

Fictional API reference | Version 1.0

Document ID:	SAMPLE-API-003
Owner:	Demo Integration Team
Category:	API Specification

1. Example API endpoints

GET /api/ingestion/documents - list repository records.

POST /api/ingestion/documents - upload a document using multipart form data.

PATCH /api/ingestion/documents/{id} - update metadata or replace a source file.

DELETE /api/ingestion/documents/{id} - soft-remove the record with a reason.

2. Metadata update example

JSON body: { "documentCategory": "Architecture", "description": "Updated sample architecture reference" }

3. File replacement example

Send multipart fields named file, documentCategory, and description. The exact path, method, authorization, and response envelope must be confirmed with the backend team.

4. Example response fields

documentId: SAMPLE-API-003; fileName: sample-api-integration-guide.pdf; fileType: PDF; fileSize: 123456; status: INGESTED; chunks: 12.

5. Test scenario

Use this PDF to test upload and then replace it with sample-technical-specification.pdf. Verify the displayed name, file size, and status.
