Knowledge Intake - Business Req.

Fictional business requirements | Version 1.0

Document ID:	SAMPLE-BR-002
Owner:	Demo Operations
Category:	Business Requirements

1. Business objective

Provide an auditable workspace where an operations user can submit reference documents and monitor their processing lifecycle. The interface should make file status clear and reduce accidental document changes.

2. User stories

Operations user: upload a source file and see a new repository record.

Operations user: change a category or description and see updated metadata.

Operations user: replace an incorrect source file and restart processing.

Operations user: remove an outdated record with a reason and retain its audit row.

3. Business rules

Supported file formats are PDF, XLS, and XLSX. Maximum file size is 25 MB. A replacement file is optional when editing. Removed records are retained in an audit-oriented view.

4. Reporting fields

Display document name, category, uploader, upload date, file size, status, and processing chunk count. Search should match file name, document ID, submitter, and category.
